

EXECUTIVE SUMMARY REPORT

WAUNAKEE SCHOOLS: NEW INTERMEDIATE SCHOOL

Week ending February 26th, 2016

What's New?

Warmer weather is on the way, at least for now. There is a lot going on at the New Intermediate School, rooms are taking shape and concrete is being poured. After finishing drywall in 2B, the crew has moved on to Area A, floors 1 & 2. The taping and painting crew is now moving through 2B giving rooms a crisp, white finish. Meanwhile, slab on grade concrete is getting poured in front office area and metal panel furring strips and insulation are getting placed on the north side of the building.

The Past Two Weeks

- Roofing over the Library and Mechanical Penthouse
- Window Frames, Curtainwall, and Exterior Glass
- Casework Blocking, Drywall, and Taping
- Masonry in Area C for Music Suite
- Ceramic Tile in Area 2B classrooms

Coming Up in the Weeks Ahead

- Architectural Wood Casework in 2B classrooms
- Roofing over Gym and Music Wing
- Exterior Metal Panels
- Taping & Painting

A telescoping fork lift hoists roofing materials onto the gym.

Panoramic view of a typical Learning Environment Room. Markerboard walls surround the room and are painted out for review. This classroom is in south side of Area 2B.

Did you know? The state of Wisconsin is home to the world's first successful typewriter, America's first kindergarten, and is the birthplace of the Ice Cream Sundae.

EXECUTIVE SUMMARY REPORT

WAUNAKEE SCHOOLS: NEW INTERMEDIATE SCHOOL

Wall tile outside a 2B restroom shows an aesthetic pattern and the color designates the Village you are in

A dual action shot with ironworkers finalizing steel in The cafeteria and roof blocking overhead on the roof.

Birds eye view of a concrete pour in Area C.

The framing you see in this picture are called furring strips and will be used to support the metal panel building skin.
