

EXECUTIVE SUMMARY REPORT

WAUNAKEE SCHOOLS: NEW INTERMEDIATE SCHOOL

Week ending March 11th, 2016

What's New?

Well folks, things are really "heating up" over at the Waunakee Intermediate School Jobsite. Slab on grade concrete was poured in Area D and preparation has started for the next SOG pour in the Gym. Millwork and Casework is getting installed in Area 2B along with interior glass. Exterior furring and insulation is going up on the North side of Areas A & B. Glass is set in Area C Music and cast stone was set in the entry vestibule.

The Past Two Weeks

- Interior Glazing in 2B
- Taping and Painting in 1A
- Steel railings
- MEP rough-ins at the penthouses and front office area

Coming Up in the Weeks Ahead

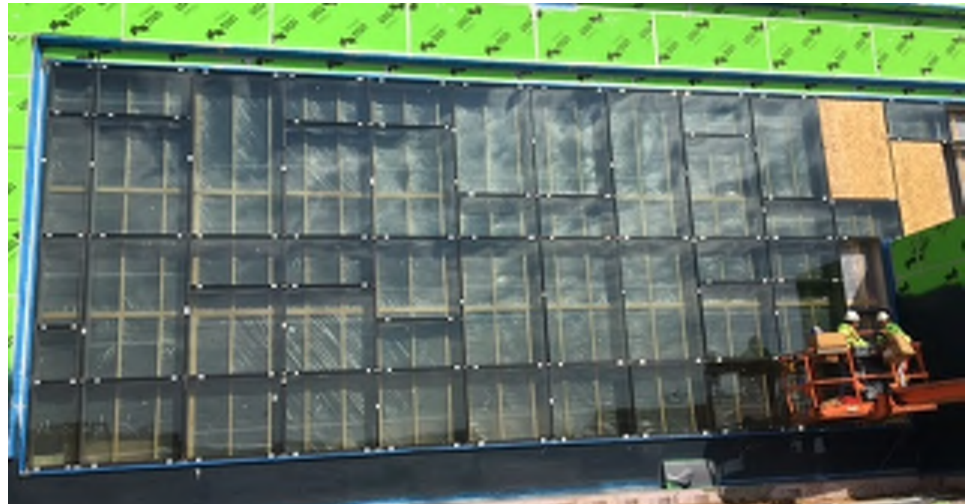

- Acoustical Ceiling Grid in 2B
- Millwork/Casework in 2A
- Cast Stone and Brick Veneer on A & B
- Roofing Area D
- Slab on Grade in Gym
- Metal Panels

Casework installation begins in the 2B Collaboration Area

More concrete pours in Area C

Exterior glazing on South side of the Library

Did you know? Scientists believe that Ancient Greeks and other ancient cultures could not see the color blue. Blue doesn't appear at all in ancient texts. Studies say language shapes what we see and since these ancient civilizations didn't have a word for blue, they didn't notice it. The Himba people in Namibia do not have a word for blue and tests have shown they have difficulty distinguishing between green and blue.
