

EXECUTIVE SUMMARY REPORT

WAUNAKEE SCHOOLS: PRAIRIE ELEMENTARY

Week ending September 11th, 2015

What's New?

With the addition now complete, teachers and new students are enjoying the brand new space. The first day of school was last week, along with smart board installation. Findorff and other subcontractors also completed the punch-list last week, leaving Prairie Elementary completely to the teachers and students!

The Past Two Weeks

- SmartBoard Installation
- Paint touch-ups
- Punch-list completion
- Final Cleaning
- First Day of School

The new SmartBoards have been installed for interactive learning.

The cubbies are now stuffed with student's items such as mats for sitting, backpacks, shoes, and pencils!

Restroom in new addition.

Did you know? SMART (manufacturer of the SMART Board) created the world's first interactive whiteboard in 1991, which led to the first fully-integrated interactive projector with touch recognition in 2012.
