## WAUNAKEE SCHOOLS: PRAIRIE ELEMENTARY

April 24, 2015

### What's New?

The foundation of the new addition is beginning to take form! After the excavation performed by Dane County Contracting, crew members from Findorff formed the foundation walls and footings. The footings of the addition are complete and the foundation walls are nearing completion as well. With the help of a few Prairie Elementary students shown below, the site continues to be a great example of safe construction.

### The Past Week

- Footings for the addition were completed
- Material deliveries
- Excavation

### Coming Up in the Week Ahead

- Foundation wall work continues
- Backfill and compaction
- Slab on Grade Pour

Northern foundation walls that were recently poured.

Students from Prairie Elementary made hand drawn safety signs for the site!

Wall forms constructed by Findorff crew.

**Did you know?** That only 18% of people in the United States speak a foreign language? However, the students at Prairie Elementary used their foreign language skills to make the sign "Peligro, Use Casco Protector En Esta Area" which means "Danger, Hard Hat Area!" in English.
