

Policies of the Board of Education

Series 400: Students

**STUDENTS WITH CYTOMEGALOVIRUS (CMV) OR  
ACQUIRED IMMUNE DEFICIENCY SYNDROME (AIDS)(HIV)**

453.31-Rule

The superintendent has the authority to temporarily remove a student with CMV, HIV or AIDS in accordance with the following guidelines:

- 1) Under the following circumstances, a student with CMV, HIV or AIDS, might pose a risk of transmission to others:  
If the student lacks toilet training, has open sores that cannot be covered, or demonstrates behavior (e.g. biting) which could result in direct inoculation or potentially infested body fluids into the bloodstream.  
If any of these circumstances exist, the school nurse and the student's physician must determine whether a risk of transmission exists. If it is determined that a risk exists, the student shall be removed from the classroom.
- 2) A student with CMV, HIV or AIDS may be temporarily removed from the classroom for the reasons stated in #1 until either an appropriate school program adjustment can be made, an appropriate alternative education program can be established, or the school nurse and student's physician determines that the risk has abated and the student can return to the classroom.

Adopted: March 1994

Revised: March 2002
